To Whom It May Concern:

This is to certify that, Mengqi Li has successfully completed his summer internship in Myriad China, with excellent remarks from his supervisor and team members in the company.

Throughout his work with the company, Mengqi has shown exceptional capability of quickly learning new techniques and independently accomplishing tasks assigned to him. Within the short period of his internship, he has managed to grasp many skills in the areas of test automation, development process, design methodology, quality control, trouble-shooting, and good software engineering practices. And he has been able to eventually deliver quite a few key modules to our proprietary auto-test platform.

He worked hard with a strong sense of responsibility, and was eager to learn and willing to do whatever it takes to get the job done.

As a member of our special project team, he also co-operated with other team members very well, with good written and verbal communications skills.

It would be my great pleasure to recommend Mengqi for any further academic advancement and professional career in the field of software engineering. I am confident that he will be a valuable member of this exciting profession.

Please feel free to contact me if you would like more information.

Sincerely,

James Zhou, PhD

Vice President & Executive Director

Myriad Group AG
